## **Orange County Voting Systems Test Proves Accuracy**

SANTA ANA – November 22, 2005 – Accuracy testing of Orange County’s voting system was completed today for the December 6<sup>th</sup> 48<sup>th</sup> Congressional Special General Election and the systems proved, once again, to be 100% accurate. Law requires the test, known as the Logic and Accuracy test, to be performed prior to each election.

Logic and Accuracy tests include proofing the programming of the ballot, each ballot style and each contest position on the ballot.

“We are in the midst of an unprecedented series of elections and our eSlate voting system continues to prove that it is a safe, accurate voting system,” said Neal Kelley, Acting Registrar of Voters. “The voters of Orange County can continue to count on their voting system to perform well and record their votes correctly.”

The Hart InterCivic eSlate has proved to be 100% accurate in tests performed each election. The eSlate was first used in the 2004 election cycle.
